PREFACE

This bibliography was prepared in connection with the Research Analysis Corporation's work in principles of cost-effectiveness analysis, cost-benefit analysis and planning-programming-budgeting.

This listing is not intended to be exhaustive, but meant to serve as an introduction to the rapidly expanding body of literature. Most of the entries are unclassified. The citations are arranged by broad subject categories and alphabetically by author within these classifications.

The material was obtained from references provided in individual documents and in published bibliographies. ←

The helpful assistance of the RAC library staff is gratefully acknowledged.
